
Philips Creates New HPS Lamp approved with Metrolight's High Frequency Ballast

Philips has announced that they have created new versions of their **MASTER SON-T APIA Plus Xtra 250W** and **MASTER SON-T APIA Plus Xtra 400W** HPS lamps for use with Metrolight's high frequency ballast. This provides a significant increase in lamp lifetime and provides a much lower depreciation in lumens over the entire extended lamp life.

The lamps have been tested in-house by Philips, using Metrolight ballasts – which have been approved by Philips to be a perfect match and are recommended for use.

The lamps are:

- **9281 044 19231 MASTER SON-T APIA Plus Xtra 250W HF E40 1SL/12**
- **9281 045 19228 MASTER SON-T APIA Plus Xtra 400W HF E40 1SL/12**

Philips provides full warranty when using Metrolight ballasts.

Please contact Philips for more information.

Conclusion:

The **MASTER SON-T APIA Plus Xtra 250W HF E40** & **MASTER SON-T APIA Plus Xtra 400W HF E40** will be performing according to specification on the **Metrolight SmartHID 250W & 400W** drivers (as produced from 2010 onwards).

With this we can state that the lamps should be performing well, and can be used in combination with your gear.
